PAP Risk Factor High Elevation Test Chart

PAP test conducted at elevation above 7,000 feet

All Quest of the West Sale Bulls PAP Tested at 7,200+ feet Elevation

PAP	Use at Low Elevation	Use at Moderate Elevation	Use at High Elevation	Use at Extreme Elevation
Score	< 4,000 feet	4,000-5,000 feet	5,500-7500 feet	>7,500 feet
34-39	Low Risk	Low Risk	Low Risk	Low Risk
40-45	Low Risk	Low Risk	Low Risk	Low Risk
46-49	Moderate Risk	Moderate Risk	Moderate Risk	Moderate Risk
>=50	Moderate Risk	Moderate Risk	High Risk	High Risk

- Special consideration should be given to the amount of time the animal was exposed to elevation (>5,500 feet) prior to testing. The predictability and repeatability of the PAP measurement improves with longer the exposure to higher elevation (minimum of 4 weeks is required).
- This chart is based on animals greater than 10 months of age.
- Testing of younger animals (<10 months) may result in a greater variability to the predictive ability of the measurement.
- Risk—Defined as the likelihood of an animal developing pulmonary hypertension themselves or being at risk for having a genetic predisposition for the disease.

BREEDING GUARANTEES

All bulls in this sale are guaranteed “breeders” the day of the sale. In the event a buyer finds a bull to be a “non-breeder”, he must immediately take the following actions:

1. Notify the seller within six (6) months of the purchase.
2. Return the bull to the seller at the buyer’s expense in healthy and good condition.
3. At that time, the seller may give the buyer a bull of like quality as a replacement, or give the seller credit toward the purchase of another bull at a later date.
4. Seller has the right to prove the bull a “breeder” before giving credit or returning the bull.
5. Guarantees do not apply to injuries (i.e. broken legs, stifles, reproductive injuries, etc.)
6. All guarantees are void in cases where the bull is fit for show, is subject to hormonal treatments, or has been subject to abuse in any way.

Balancers • Gelbvieh • Simmental

ACCOMMODATIONS

For reservations, please call the Quality Inn (801-798-9400) or the Hampton Inn (385-248-0550). Both are just off I-15 on Hwy 6 (Exit 257 Northbound; Exit 258 Southbound). On Hwy 6 going east take first Left at the light, and next left after Chappy's Gas Station.

SALE LOCATION

The sale will be held in the Heritage Arena at the Spanish Fork Fairgrounds, 475 S Main Street, Spanish Fork, UT

INSPECTION OF SALE CATTLE

All Cattle will be available for viewing all day Friday March 13th through the conclusion of the sale at the sale facilities. Cattle may also be viewed prior to Wednesday March 11th at the respective ranches at Spanish Fork, UT, and feedlot in Delta, UT. Please contact the individual sellers to make arrangements to view the cattle prior to their arrival at the sale facility.

TERMS AND CONDITIONS

The terms of the sale are cash or check unless arrangements have been made between buyer and seller prior to the beginning of the sale. The animal becomes the property, responsibility and risk of the buyer as soon as declared sold by the auctioneer.

ANNOUNCEMENTS

Announcements from the Auction Block will take precedence over any other printed matter in the sale catalog or supplement sheets.

BIDDING

Each Animal will sell to the highest bidder. Any disputes will be settled by the auctioneer whose decision is final.

LIVESTOCK MORTALITY INSURANCE

To properly insure your investment, James F. Bessler, Inc., will be available to assist you with mortality insurance. Contact Jim Bessler at 630-945-3483 or jim@jamesbessler.com.

RISK & LIABILITY

We the sellers of the cattle offered in this sale, will not be held liable for any accidents that may occur for whatever reason and those attending must do so at their own risk. The sellers and their staff, the auctioneer, Spanish Fork City and its staff assume no liability, legal or otherwise, for any accidents or loss which may occur.

Bryce Tolbert, President	Utah Cattleman's Association

REGISTRATIONS & TRANSFERS

All bulls, unless otherwise noted in the sale catalog are registered. When making settlement, please indicate if Registration papers are needed. Each ranch will send the registration paper to the buyer if requested at the time of settlement.

SIGHT UNSEEN PURCHASE OPTION

If you are unable to attend the sale or view the cattle prior to the sale, we offer a "sight unseen" purchase option. Please call and give us your specs in advance of sale time and we will select and try to buy the bull(s) meeting your specs for you. If when you take possession of the bull(s) you are not satisfied, you don't own the bull(s).

CALVING EASE RECOMMENDATION

Some bulls are recommended for use on heifers. These recommendations are based on available tools and knowledge: EPDs, birth weight, extended pedigree and past experience with both sire and dam. This does not mean that you will not have to help any calves, but hopefully most will come with little assistance. Each cattleman needs to base their decisions on their own program and herd.

DELIVERY

Please contact individual consignors prior to the sale if you need assistance with delivery.

Minimum Genetic Requirements

Marbling EPD (Marb)	+0.65
Dollar Grid Carcass Index (\$G)	+55.0

Videos of sale cattle will be posted 2-3 weeks prior to the sale.
The sale catalog will be posted online as well as additional pictures as they become available at www.questofthewestcattle.net

Angus Bulls

All of the Angus bulls have been sire verified and genomic tested with AngusGS. Buy them with confidence. They are backed by the power of the Angus database, which includes phenotypes and genotypes from herds across the country. We stand behind the pedigrees. By buying the Angus bulls and heifers offered in this sale, you are unlocking the premium potential of AngusLink and other programs.

Herd sire material here! If you're looking to put a bull on your cows that will add mass, muscle, rib, bone and capacity to their calves, check out lot 1. Out of the 10-year old proven sire, Musgrave 316 Stunner, whose semen is getting harder to find, and a 14-year old dam that has stood the test of time. Stunner was the #3 Pathfinder sire in the breed in 2025. Huge spread from birth to weaning. Top 10% - WW, Milk, Claw & \$W; 15% - Angle; 25% - PAP. Big scrotal bull with the added bonus of a 38 PAP at 7,200 feet.

Poss Rawhide has been used extensively across the country, making him a top 10 sire for registrations in the breed. He brings growth and maternal traits as well as carcass merit to the table, with him meeting CAB requirements. He posted the highest 205 adj. WW of all Angus bulls at 869 lb. This bulls dam is a daughter of our U76 donor. U76 ET progeny sell as lots 94-96 in the SimAngus division. He puts all of this in a package with a PAP score of 35 at 7,200 feet.

Glossary of Terms

IT IS IMPORTANT TO REMEMBER NOT TO COMPARE EPDS FROM BREED TO BREED!

EPDs (*Expected Progeny Difference*): EPDs are a statistical measurement of a bull's ability to transmit certain traits to his offspring based on his dams, sires and own production & performance record, as well as his own progeny's record when data is submitted. EPDs allow for the evaluation of cattle of the same breed from ranch to ranch with out concern for differences in environment, nutrition and management. **IT IS IMPORTANT TO REMEMBER NOT TO COMPARE EPDS FROM BREED TO BREED!** The following are descriptions of the EPDs used in this catalog.

CED: Calving Ease Direct is expressed as a difference in percentage of unassisted births with a higher value indicating greater calving ease in first-calf heifers.

BW: Expressed in pounds, is a predictor of a sire's ability to transmit BW to his progeny compared to that of other sires. The lower the EPD, the lighter the BW on average.

WW: Expressed in pounds, is a predictor of a sire's ability to transmit growth to weaning in his progeny compared to that of other sires. The higher the EPD, the heavier the WW on average.

YW: Expressed in pounds, is a predictor of a sire's ability to transmit growth to yearling in his progeny compared to that of other sires.

Milk: A predictor of a sire's genetic merit for milk & mothering ability transmitted to his daughters.

%IMF: A predictor of a sire's progeny for % intramuscular fat (marbling) in the rib eye compared to other sires.

RE: A predictor of the difference in square inches of ultrasound rib eye area of a sire's progeny compared to the progeny of other sires.

FAT: A predictor of the difference in ultrasound fat thickness at the 12th rib of a sire's progeny compared to the progeny of other sires.

CW: (*Sim*) A predictor of the difference in carcass wt. of a sire's progeny compared to the progeny of other sires.

YG: (*Sim*) A predictor of the difference in Yield Grade of a sire's progeny compare to the progeny of other sires. Like actual Yield Grade itself, the lower the number the better.

\$W: (*Angus*) Weaned Calf Dollar Value EPD quantifies four primary economic impact areas (BW, WW, Maternal Milk, & Mature Cow Size) and combined into an economic value expressed in dollars per head.

\$F: (*Angus*) Feedlot Value, an index value expressed in \$/hd & is the expected average difference in future progeny performance for post weaning merit compared to progeny of other sires.

\$G: (*Angus*) Grid Value, an index expressed in \$/hd & is the expected average difference in future progeny performance for carcass grid merit.

\$B: (*Angus*) Beef Value, a simultaneous multi-trait genetic selection for feedlot & carcass merit, & predicts the average \$/hd difference in the progeny's post weaning performance & carcass value compared to progeny of other sires.

YG: (GV) Differences in yield grade score, which is a predictor of percent retail product. Smaller values suggest that progeny will have a better lean to fat ratio.

CW: (GV) Differences in pounds of hot carcass weight, adjusted to an industry standard age endpoint.

REA: (GV) Differences in ribeye area in inches between the 12th and 13th rib. Greater ribeye areas are preferable.

MB: (GV) Predicts the differences in the degree of marbling within the ribeye as expressed in marbling score units. Greater marbling numbers are preferable and are an indicator of higher carcass quality grades.

FT: (GV) Differences for fat thickness, in inches, for a carcass over the 12th rib, smaller numbers of fat thickness are preferable as excess fat can be detrimental to yield grade.

The USDA Risk Management Agency helps protect your Pasture, Rangeland, and Forage (PRF) from the elements.

When buying business insurance, it's okay to have a generalist agent.

When buying PRF insurance, it's SMART to have a SPECIALIST.

Protect Your PRF (Pasture, Rangeland, Forage)

Our trusted risk advisors are trained to help you understand and analyze complicated insurance data so you can make the most informed decision for your business. Our goal is to ensure you never purchase unnecessary coverage and pay more than you need. Protect your land and livelihood against potential losses during times of drought.

Why now?

- Very affordable – Government subsidized
- Premiums are not due until Oct. 1
- No adjusters needed
- No claim forms
- Protects your cash flow

Very unique herd sire prospect here. If you like the halfbloods that have some length, rib shape and bone, you'll want to check this one out. Whether you are making steers to sell or females to retain, he will get the job done. In addition, he had a PAP of 32 at 7,200 feet. 1/2 SM 1/2 AN.

Everyone loves a little chrome on their bulls face, especially when they're good. Quality runs deep with this herd sire prospect. Lot 92 is a full sib to the high selling SimAngus heifer in the 2025 sale. He's got it all, including an awesome PAP score of 30 at 7,200 feet. In the words of our auctioneer, Eric Duarte, "you can run him to the moon and back!" 1/2 SM 1/2 AN.

Lot 96 is a herd sire prospect that could do great things in the right hands. He has a demanding presence, whether on the profile or on the move. This Broker son has a great disposition, great feet and legs and is sound. Well balanced from end to end. Should make an awesome set of females. Flushmate to lots 94 and 95. PAP 33 at 7,200 feet is a bonus. 1/2 SM 1/2 AN.

Purebred with a strip face. Quiet disposition, good calving ease and birthweight EPD's. Will add good disposition and beautiful uddered daughters.

ABOVE AVERAGE GOALS REQUIRE TARGETED BULLS

Aim High

The Targeting the Brand™ logo highlights registered Angus bulls with greater genetic potential to produce calves that meet the most challenging specifications of the Certified Angus Beef® brand.

Minimum Genetic Requirements

Marbling EPD (Marb)	+0.65
Dollar Grid Carcass Index (\$G)	+55.0

Only 1 in 4 non-parent Angus bulls qualify.

For more information on Targeting the Brand™ visit CABcattle.com.

Angus Heifers

Sorensen Angus Ranch always holds back a fancy set of Angus and SimAngus heifers to feature at the sale. These heifers are from the heart of our program. Most of these heifers are sired by top AI sires. The two that aren't are sired by bulls purchased out of the renowned Sitz Angus program. These heifers have been cycling and could be bred anytime.

TOUGH ON TOUGH WORMS, EASY ON CATTLE PRODUCERS.

INTRODUCING VALCOR™ (doramectin and levamisole injection)

Now you can achieve effective parasite control in one product, where before you may have needed two. Valcor (*doramectin and levamisole injection*) is the first prescription cattle dewormer with two active ingredients in one dose. It's never been easier to be tough. Get tough at ValcorTough.com.

IMPORTANT SAFETY INFORMATION: Do not treat cattle with Valcor within 15 days of slaughter. Not for use in female dairy cattle 20 months of age or older, including dry dairy cows; not for use in beef calves less than 2 months of age, dairy calves, and veal calves. Safety has not been evaluated in breeding bulls. Use with caution in cattle treated with cholinesterase inhibitors. This product is likely to cause injection site swelling; tissue damage (including granulomas and necrosis) may occur. These reactions have resolved without treatment. See Brief Summary of Full Prescribing Information on the next page.

Pricing A Bull

We have all been asked to speculate what the prices of bulls are going to be from year to year. With the price of cattle in historic ranges, and the declaration of some economists that the “traditional” cattle cycle is dead, it may be hard to determine just what a bull is worth. Several people over the years have come up with formulas that could blow up any cowboy’s smart phone when trying to calculate the worth of a bull.

However, even with all these new fangled formulas,
there are some tried and true calculations that have stood the test of time.

One of the formulas that has stood the test of time with history proving the theory shows that the price of three 800 lb steers is equal to the base price of one bull. We all know the expensive costs of developing a bull properly and the costs of making sure he is ready to breed cows. And we know that a quality bull will yield you more dollars than an average or lesser quality bull when you market your calves, but we feel the above formula (Cost of 800 lb steer X 3 = Base cost of a bull) is a good place to start in determining the base price of a bull.
